Team ID	INDIVIDUAL PROJECT
Project Name	ShopEZ: E-commerce Application
Maximum Marks	2 Marks

Customer Problem Statement Template:

Here is the exact structure from image_837245.png showing only the customer (buyer) problem statement for your **ShopEZ** project.

Customer Problem Statement

Core	Guided Context	ShopEZ Project Application
I am	<i>Describe customer with 3-4 key characteristics - who are they?</i>	An everyday mobile online shopper who looks for quick, easy deals.
I'm trying to	<i>List their outcome or "job" they care about - what are they trying to achieve?</i>	Find products fast, use a simple cart, and check out safely.
but	<i>Describe what problems or barriers stand in the way - what bothers them most?</i>	The app runs slow, the filters fail, and checkout feels insecure.
because	<i>Enter the "root cause" of why the problem or barrier exists - what needs to be solved?</i>	The backend database lacks indexing and needs secure token guards.
which makes me feel	<i>Describe the emotions from the customer's point of view - how does it impact them emotionally?</i>	Frustrated and afraid to trust the platform with my private data.

Example:

Customer Problem Statement (CPS) Matrix

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	An everyday mobile online shopper who looks for quick, easy deals.	Find products fast, use a simple cart, and check out safely.	The app runs slow, the filters fail, and checkout feels insecure.	The backend database lacks indexing and needs secure token guards.	Frustrated and afraid to trust the platform with my private data.
PS-2	A returning customer looking to manage my active orders.	Track my package delivery status and view my past purchase history.	I cannot find clear tracking updates or see where my order is currently held.	The order system lacks dynamic state updates and historical record tracking.	Anxious about whether my package will actually arrive on time.
