## Project Overview

- Project Name: ShopEZ: Online E-Commerce Shopping and Order Management System
- Project Description: ShopEZ is a web-based e-commerce application developed to simplify the product discovery, purchasing, and order fulfilment process for online retail businesses. The system allows users to browse an inventory catalogue, execute high-speed indexed product searches, complete single-step secure checkouts, and track their package delivery status in real-time. It also enables administrators to manage product catalogues efficiently, monitor transactions, and update order statuses in an organized manner, reducing delays caused by legacy, unoptimized checkout workflows.
- Project Version: Version 1.0
- Testing Period: 18 Jun 2026 to 18 Jun 2026

## Testing Scope

### Features and Functionalities to be Tested:

- User registration and login system with secure stateless token validation
- Online product discovery search and compound filter system
- Single-page one-step checkout and data verification form
- Admin dashboard for order fulfilment and inventory management
- Order state transition and delivery tracking update system

### User Requirements to be Tested:

- Users should register accounts and log in securely to the marketplace
- Users should find products instantaneously using indexed search tags
- Users should submit cart purchases quickly via a secure one-step checkout
- Admin should view, track, and manage all customer transaction records
- Admin should update shipping and delivery tracking progress states
- System should securely store financial data and user credentials without lag

## Testing Environment

- URL/Location: Local Host / Web Application Staging Environment
- Credentials (if required):

Customer User: [john@shopez.com](mailto:john@shopez.com)

Password: password123

Store Administrator: [admin@shopez.com](mailto:admin@shopez.com)

Password: admin123

## Test Cases Table

| Test Case ID | Test Scenario              | Test Steps        | Expected Result                                                       | Actual Result    | Pass/Fail |
|--------------|----------------------------|-------------------|-----------------------------------------------------------------------|------------------|-----------|
| TC001        | User Registration          | Open registration | User account created successfully                                     | Account created  | Pass      |
| TC002        | Secure Checkout Submission | Login             | Order should be registered and secure payment processed               | Order registered | Pass      |
| TC003        | Order Status Tracking      | Login             | Order tracking status should be displayed (Pending/Shipped/Delivered) | Status displayed | Pass      |
| TC004        | Admin Order Management     | Admin login       | Admin should see and manage customer orders and tracking updates      | Orders shown     | Pass      |

### Bug Tracking

| Bug ID | Bug Description                                | Steps to Reproduce   | Severity | Status | Additional Feedback                    |
|--------|------------------------------------------------|----------------------|----------|--------|----------------------------------------|
| BG001  | Checkout form submission delay                 | Fill checkout form   | Medium   | Closed | JWT validation latency issue corrected |
| BG002  | Order tracking status not updating immediately | Submit status change | Low      | Closed | Page refresh caching issue resolved    |
